

Fall "to do" list:

1. Clean & check my natural gas appliances as cooler weather nears.
2. Check pilot lights for a "sharp" blue flame.
3. Post WBNG's number on the fridge, in case I smell gas or have a safety concern.
256-974-9023
4. Check damper on chimney...it needs to be open with my vented gas logs.
5. Buy a programmable thermostat...to help reduce my utility bill.
6. Replace my old appliances with new natural gas models that are more energy efficient and could save me even more money on my utilities.
7. Buy furnace filter's in order to change filter each month.
8. For more energy saving ideas visit:
