

**\*\*\*\*\*NATURAL GAS PLUMBER INFORMATION\*\*\*\*\***

Thank you for considering Wheeler Basin Natural Gas Company, Inc. for your natural gas requirements. To comply with the law and WBNG's policies natural gas house piping must be installed by a certified natural gas pipe fitter, and WBNG must witness a successful pressure test of 15 lbs for a minimum of 15 minutes.

You should use a currently certified Master Gas Fitter familiar with industry laws, codes and standards, as well as WBNG's policies, for installing your gas piping. Using a qualified gas fitter and asking questions up front could save you time and money as additional visits to witness pressure tests to turn on service will require re-scheduling and additional charges.

**Remember:**

- A currently certified gas plumber must install your natural gas piping and meter connection before gas is placed in service.
- Your natural gas piping and pressure test must meet the requirements of your service area inspection department or authority.
- The first trip to witness the pressure test to activate service is free.
- There will be additional charges if additional trips are necessary.

We are available to answer any questions that you or your gas plumber may have regarding your gas piping and our turn on policy, procedure and charges.

Please feel free to call us at **256-974-9023** if you have any questions.
